PUBLIC ADVOCACY POLICY

It is the policy of Mitsu Chem Plast Limited to actively engage in public advocacy efforts that align with the company's core values and vision. Our efforts are aimed at improving the safety and health of all stakeholders, protecting the environment, promoting the security, privacy, and protection of data and information, fostering free, fair, and transparent trade, and supporting the growth and development of Indian industries.

To achieve these goals, the company will work in collaboration with associations, institutions, and organizations (both governmental and non-governmental) that share similar objectives. We will actively engage with these groups to support policy formation, advocate for legislative changes, and leverage our collective voice to bring about positive change.

Our approach to public advocacy will be grounded in integrity, objectivity, and transparency. We will prioritize our involvement in associations and organizations that demonstrate merit and align with our values. At the same time, we will remain open to constructive critiques from stakeholders as we strive to improve our advocacy efforts.

We recognize the ever-changing nature of the regulatory, socio-political, economic, and business environment, and will review and update our public advocacy policy periodically in response to these changes. We remain dedicated to playing an active and positive role in shaping the policies that govern our communities, our industries, and our country.
